

Xtreme

The Ultimate Tyvek Alternative!

Comparable to Tyvek feature for feature but with superior printability!

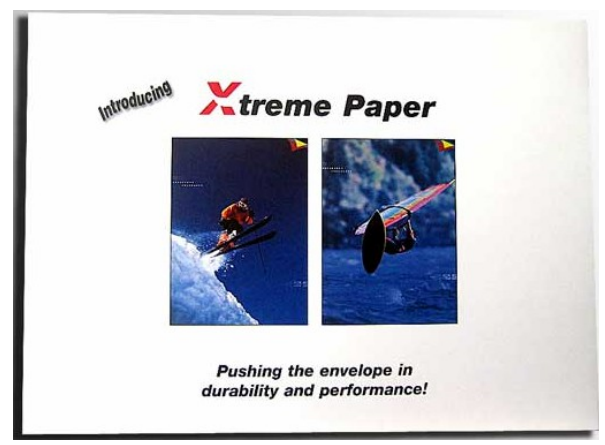

FEATURES	BENEFITS
Trilaminated Sheet: poly sandwiched between two layers of paper	➔ Offers excellent content protection
Material converts like regular paper	➔ No retraining or retooling required for machinery, saving time and money
Excellent printing surface for high-end graphics	➔ Better brand recognition, brighter colours, more impact with graphics
Infinite customization possibilities (eg. emboss, die-cut, foil, perforate)	➔ Flexibility depending on specific application
Moisture, tear & puncture resistant	➔ Helps solve humidity curling problems from storage and package failure in the delivery channel
Peel & Stick closure	➔ Easy to seal
Recyclable (the paper & poly are separated much the same way as window envelopes are recycled)	➔ Safe for our environment
Meets Canadian & U.S. Postal Standards	➔ Worry-free mailing
